GAME OVERVIEW

What if bot was one of us

I'm not a robot is an amusing fast-paced game of deduction. One of you takes on the role of a robot pretending to be a human. Relying on other players' associations they try to figure out which picture is the key to access an important database... Even if the robot has no clue it can still have its way – it only has to be humanly clever to remain undisclosed!

GAMEPLAY

The Game is played over the course of 6 rounds.

Each round you lay photos in a 3x3 grid and give each photo a number from 1 to 9.

Each player receives a role and 1 role card is left on the table. Then everyone must give a 1-word association to the right card.

Humans know the right card. Robot is trying to blend in.

Robot could reveal itself and name the right picture, if associations were too obvious, otherwise continue to the next phase.

You reveal the card with the right answer and everyone must explain their associations in the order they were given.

After that you may discuss and vote for the player you think is the robot, but remember that 1 role card is left on the table and there may be a situation where there is no robot among the players.

ROUND END

If the majority guessed correctly, humans win, otherwise robots are victorious.

Players who guess correctly get a point in either way.

GAME END

After 6 rounds the player with the most points wins.

KEY SELLING POINTS

- Deduction party game unlike any other
- Easy to learn, easy to set up
- Great replayability
